

DISPOSABLE
LATEX GLOVES

Our ambition is to make healthcare widely accessible by empowering self-care globally.

Driven by our spirit of innovation, **Advent Life** specialises in self-tests for a wide range of medical conditions, while also offering other products that allow everyone to take health into their own hands. We enable people to take the first step themselves and at their own convenience.

Advent Life focuses on bringing the best from the world while prioritising safety and easy-to-use products. We design premium brands that are delivered to pharmacies, hospitals, laboratories, public organisations and government institutions.

PURPOSE

The main advantages of latex gloves are their high elasticity and durability, without detracting from the necessary touch sensitivity during high-precision manipulations.

Disposable latex gloves are made of natural rubber latex. They protect both the wearer and the object being handled as they act as a barrier that helps prevent infection. They are widely used in medical facilities and laboratories.

This product is suitable for healthcare professionals who require reliable hand hygiene when interacting with patients.

SPECIFICATIONS:

- Colour – white
- Ambidextrous (suitable for both hands), powder-free, odourless.
- Non-sterile
- They contain natural latex
- They protect against contamination with bacteria and fungi
